

About OASIS

OASIS was created in an effort to align independent otolaryngology practices. Our annual meeting has become a national platform whereby current events and challenges are uncorked by thought leaders from our field. We have carved a path to add value for our members, and we have become a home for the advocacy of all issues pertaining to the independent and private practice of otolaryngology.

We have over 250 physician members, across more than 130 locations in 7 states, and we are growing. Our network—focused on independent, physician-owned practice—creates efficiencies and synergies between our members to meet our mutual goals.

As a member, your practice will be able to take part in:

- Clinical outcomes improvement projects
- Best practice in allergy treatment
- Collegial resources for ENT and allergy treatment
- CEUs for program participation
- Free participation in our annual symposium
- Development and guidance for future initiatives
- The OASIS network member website
- Partner and manufacturer benefits (see below)

Fuel Medical's Allergy EDGE

Fuel Medical works with a diverse group of specialists, including ENTs, otologists, audiology private practices and universities, to develop custom tools and actionable solutions designed to streamline and improve the efficiency of each practice's performance while improving patient outcomes.

Software

Allergy EDGE™ software is the best-practice solution for the provision of allergy immunotherapy. From patient intake through the testing process and explanation of test results, Fuel's software and treatment protocols promote the best outcomes for both your patients and your practice.

Services

Fuel's allergy expertise spans the service spectrum. In addition to specialized software, Fuel has customizable solutions that support the overall practice. Service areas include:

- Marketing
- Finance
- Operations
- Digital
- Human Resources
- Professional Development
- Career Placement
- Mergers & Acquisitions
